

## **Spaces and Exchanges**

**This notion deals with the geographical and symbolic areas that all societies occupy and the interactions between men and/or different societies.**

**Our world is built on the exploration and conquest of new spaces.**

**The different cultural, economic, sociological and language interactions have shaped and characterised our modern-day world.**

Examples can be:

- Trade (the basis of all societies).
- Working conditions (telecommuting, internet).
- Globalization (the world has become a small village).
- School and education (social diversity / knowledge), comparison of the different educational systems.
- The Internet / social networks...
- the movement of people: Immigration.
- movement across borders.
- mass tourism.
- means of transportation.
- etc.
